

Hello,

It was another fantastic week at HCFS.

We were concentrating on multiplication in Maths this week, going over our formal written methods and solving word problems. Next week, we will be using our multiplication knowledge and applying it to work with fractions.

We continued to investigate the story of Wonder in English, developing our own precepts and generating our own word banks. Next week, we will investigate different people's perspectives on August and use drama to demonstrate this.

In Project, we looked a look back to Geography and used a range of different graphs to interpret data about deforestation in the Amazon. Next week, we will look more closely at the indigenous communities that live in the Amazon, particularly focusing on Sonia Guajajara and her activism.

Sparrowhawks had a great first week at swimming and will continue their lessons next week.

Have a lovely weekend!

Mrs Good
